BEAUTY FROM WITHIN

## A supplement ingredient for beauty-from-within

- New study shows increased hydration at 4 weeks
- New study shows wrinkle reduction at 8 weeks
- Long-lasting effects
- NDI with claim "Helps Maintain Healthy Skin"
- Non-GMO, non-allergenic
- Perfect for beauty drink formulations & softgels

At the nexus of the health & wellness and cosmetics markets, beauty-from-within is emerging as one of the fastest growing product segments today. Some experts peg global growth at over 10% in the next five years with the fastest uptake in North America. One interesting characteristic of this growth is that it occurs in all age demographics and across a broad range of consumer product types.

ceratiq® Phytoceramides is an exciting ingredient to help address this market. It offers a range of benefits that are associated with youthful skin. Improved overall skin health, fewer wrinkles, increased elasticity, suppleness and a more radiant appearance. A natural, vegan source of ceramides – a class of lipids known as ‘the skin’s natural sealant’ – ceratiq Phytoceramides is available in oil and water-soluble powder forms and can be a perfect added benefit in a wide range of beauty-from-within formulations.

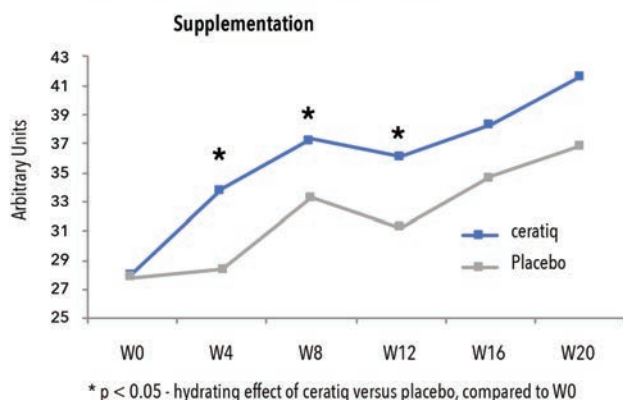

# SCIENTIFIC SUPPORT FOR FAST-ACTING, EFFECTIVE HYDRATION AND WRINKLE REDUCTION

A new double blind, placebo-controlled study was designed to evaluate the efficacy of ceratiq on skin hydration and on overall wrinkle reduction. The subjects received either 350 mg of ceratiq oil or the placebo for 12 weeks.

## WRINKLE REDUCTION

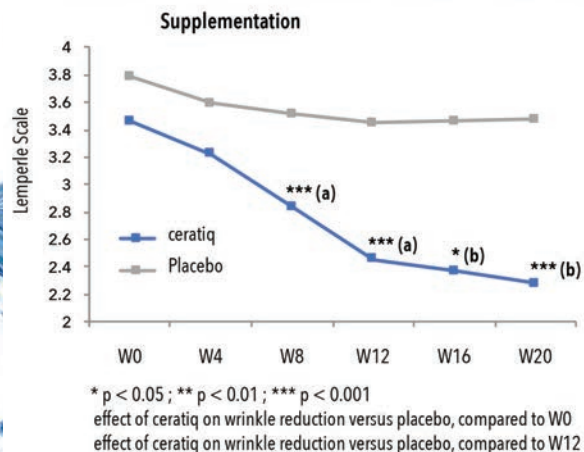

In ceratiq group, wrinkles were **significantly and visibly reduced, from 8 weeks ( $p < 0.001$ )**, compared to the placebo.

### LONG-LASTING HYDRATION (CORNEOMETRY)

The wrinkle reduction was visible for **88% of women** after 12 weeks.

### LONG-LASTING WRINKLE REDUCTION (LEMPERLE SCALE)
